

PRODUCT DESCRIPTION

To create superior, adaptable, non slip and durable surfaces Composite Engineering uses only the finest materials available.

The 38mm thick grating has a 32mm square hole size and provides the greatest variety of uses because of its superior strength and cost competitiveness against fabricated steel related products. (Only 18 kilos per sq/meter).

Stocked sheet sizes and colours are

- 3.66m x 1.22m Yellow/Green/Charcoal
- 2.00m x 1.0m Yellow/Green

Note: Other RAL colours available on request subject to volume.

Mini-Mesh grating has holes that are just 13mm square.

The grating is 30mm thick and because of the close bearing bars, this grating has superior strength.

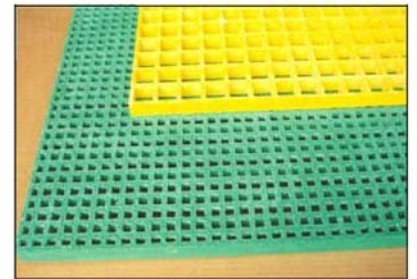

Available from stock in 2m x 1m sheets.
Colours: Yellow/Green/Charcoal

12mm machine guard is available in 3.66m x 1.22m sheets.

This type of grating has a 50mm mesh pattern instead of the usual 38mm and is ideal for use as machine guards.

A wide range of gratings are now available with a solid laminated surface. The laminate is 3mm thick and is gritted for maximum anti-slip properties resulting in a high strength, lightweight composite flooring panel.

Stocked colour – Yellow/Black
